Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 November 2009.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 68, 70-72, 74, and 76 are rejected under 35 U.S.C. 103(a) as being unpatentable over Irwin Pub. No. US 2002/0183811 in view of McDaniel US Patent No. 6,936,044 and Sullivan US Patent No. 6,602,275.

With respect to claims 68 and 74, Irwin discloses apparatus and methods of use for treating skin disorders such as psoriasis with UV light in the wavelength range of between 295 nm to 320 nm (see the abstract and paragraph [0056]).

With respect to claim 71, Irwin further teaches that the wavelength of the treatment UV light is in the wavelength range of between 300 nm to about 310 nm, centered at about 305 nm and 310 nm (see paragraph [0037]). Moreover, the treatment UV range of Irwin includes more than one peak wavelength.

With respect to claim 72, Irwin teaches that the source of the treatment light is selected from a group of UV light sources comprising lasers, lamps and LEDs (see paragraph [0041]).

However, Irwin does not teach the use of a chamber adapted to receive a patient suffering from psoriasis as claimed. McDaniel teaches an alternative phototherapy

apparatus and method of use for the treatment of skin disorders, such as psoriasis, the apparatus comprising a large light therapy unit configured to receive a patient being treated (see Fig. 8). The large therapy unit of McDaniel is configured to illuminate the patient like a tanning bed. Sullivan discloses a phototherapy apparatus and method for treating a patient, the apparatus comprising a chamber configured to receive the patient being treated (see Fig. 5). Hence, at the time of the applicant's invention, it would have been obvious to one of ordinary skill in the art to modify the invention of Irwin in view of McDaniel or Sullivan and use a chamber adapted to receive the patient being treated in order to treat skin conditions such as psoriasis. The use of chamber configured to receive a patient would allow irradiation of large area of effected skin at once. It would also reduce the treatment time.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
